

Depot depot structure

- Over head conductor rails (Siemens use Sicat SRD retractable overhead conductor rail)
- A pre-cleaning pit next to the main hall enables us to clean the vehicles before they enter the workshop .
- In the main hall elevated tracks are ready for our preventive and corrective maintenance works.
- All aspects of light ,medium and heavy maintenance are considered .
- Some tracks are specifically equipped with Underfloor Wheel-set Lathes for re-profiling the wheel-sets .

Maintenance.jpeg

- Track Bridges are integrated for fast wheel-set changes .

Maintenance_1.jpeg
