

Bit Holder

- . to remove a bit you have to pull back ON the collar
- Convenient bit removal and firm bit retention
- Magnetism for fastener retention
- Retractable guide sleeve eliminates wobbling and slipping while driving screws
- Heavy Duty magnet holds screws securely in place for easy and accurate fastening
- To eject a bit, pull inwards on the sleeve
- Optimized tip geometry for a better fit
- Promotes faster retention
- Intuitive, auto locking design
- Pressing the sleeve inwards locks a bit into position
- Pressing the sleeve outward releases a bit
- And this bit holder is still holding onto a bit at 500 g of pulling pressure
